Key Features

11.13.3

Information mapping

- ✓ Document dependencies accurately with a drag-and-drop mapping editor
- ✓ **Drag** to or from any supported source to target model pairs
- ✓ Create comprehensive mapping definitions for data dictionary entries

Document generation

- ✓ Provide secure, controlled access to metadata through wizard-driven lists, multimodel documents, and hyperlinked Web reporting
- ✓ Share documents to foster project-wide collaboration and communication, even with non-modelers

Impact analysis

- ✓ Integrate all model types by using automatic link-and-sync technology
- ✓ Streamline communication and collaboration to increase your organisation's responsiveness to change
