## BPMN 2.0 ☆ 11.13.5

Aa

Business Process Modeling Notation (BPMN) 2.0 is a standardized graphical notation intended to promote communication between non-technical business users who must document their processes and developers seeking to implement them using business execution languages.

PowerDesigner provides support for two variants of BPMN 2.0: 11.13.5

- BPMN 2.0 Descriptive - Commonly used by process owners, BPMN 2.0 Descriptive is aimed at business users and contains a subset of the BPMN 2.0 objects suitable for business process design and analysis.
- BPMN 2.0 Executable - Commonly used by process implementers, BPMN 2.0 Executable includes all the standard BPMN 2.0 objects, and is aimed at technical modelers and those who are reverse-engineering from SAP BPM or Eclipse BPMN2 Modeler.
