SAP HANA System Privileges

To be able to access an SAP HANA database, the database user must have sufficient SAP HANA system privileges.

Below is an overview of the SAP HANA system privileges needed to use all the features in DBA Cockpit for SAP HANA:

SAP HANA System Privileges

SAP HANA System Privilege	Description
BACKUP ADMIN	Schedule actions with DBA Planning Calendar
CATALOG READ	Display system and monitoring views <div><div></div><div><div>Note</div><div>Without the system privilege CATALOG READ, DBA Cockpit only offers limited functionality.</div></div></div>

	configuration files (.ini files) and statistics server alert thresholds	Was this page helpful?
SERVICE ADMIN	Display, stop, cancel, and configure services	
TRACE ADMIN	Display, delete and clear traces	
DATA ADMIN 9.1	<p>This system privilege allows you to modify and delete every object in every schema.</p> <p>9.1 Users with the DATA ADMIN privilege can delete tables and change table definitions, but cannot select or change data stored in tables, for which they do not have access privileges.</p> <div>  Caution <p>The only DBA Cockpit application that requires DATA ADMIN is the REPAIR function in the Consistency Check action in the DBA Planning Calendar.</p> <p>As assigning the DATA ADMIN authorization should be restricted as far as possible in accordance with security guidelines, the following recommendation applies:</p> <p>To use the REPAIR function, configure the DBA Cockpit temporarily with the</p> </div>	

	<p>After the REPAIR has been executed, configure DBA Cockpit again with your usual database user.</p> <p>For more information, see <i>SAP Note 1640741 (FAQ: "DB users for the DBA Cockpit for SAP HANA")</i>.</p>
RESOURCE ADMIN	<p>This system privilege allows you to reset the counters for SQL plan cache.</p> <p>For more information, see <i>SQL Plan Cache</i>.</p>
LICENSE ADMIN	<p>Install and delete SAP HANA license keys.</p> <p>Without LICENSE ADMIN, it is only possible to display SAP HANA license keys.</p> <p>For more information, see <i>License</i>.</p>
