Align your business with IT

Create tight connections between your company's unique requirements, language, and data models by using link-and-sync technology.

Improve team productivity

Help developers and enterprise architects exchange information through a secure metadata repository that supports all modelling types.

Document your existing systems

Simplify the lives of your users and IT staff with a flexible, wizard-driven system for documentation and Web-based reporting.

Information mapping
Or see our complete list of [local country numbers](#)

- ✓ Document dependencies accurately with a drag-and-drop mapping editor
- ✓ Drag to or from any supported source to target model pairs
- ✓ Create comprehensive mapping definitions for data dictionary entries

11.5

Document generation

- ✓ Provide secure, controlled access to metadata through wizard-driven lists, multimodel documents, and hyperlinked Web reporting
- ✓ Share documents to foster project-wide collaboration and communication, even with non-modelers

Impact analysis

- ✓ Integrate all model types by using automated link-and-sync technology
- ✓ Streamline communication and collaboration to increase your organisation's responsiveness to change

Technical Information

This product is deployed on premise, and system and software requirements vary by specific customer scenarios.
