Plug-in for IBM DB2 Database

==Oracle Enterprise Manager== Plug-in for ==IBM DB2 Database==

Description

9.4

The Oracle System Monitoring Plug-in for ==IBM DB2 Database extends Oracle Enterprise Manager to add support for managing IBM DB2 Database instances.== By deploying the plug-in in your Grid Control environment, you gain the following management features:

- Monitor DB2 Database instances.

- Gather configuration data and track configuration changes for DB2 Database instances.

- Raise alerts based on thresholds set on monitoring data*.

- Provide rich out-of-box reports*.

- Support monitoring of the DB2 Database by a remote Agent. For remote monitoring, the Agent does not need to be on the same computer as the DB2 Database.

Installation Instructions

1. Download the Installation Guide

2. Click on the "Download Connector Bundle" link, and save the archive on your machine

3. Follow the instructions mentioned in the installation guide

4. If multiple versions of a plug-in are available, Oracle recommends you to use the latest version of the plug-in, as long as its pre-requisites as mentioned in the documentation are met by your environment.

5. Still not sure which version to download? Review the certification matrix to see plug-in version compatibilities.

* Review the reference manual (html , pdf) for a list of metrics monitored as well as out-of-box reports for this plug-in.
